

**WRIA 1 Watershed Management Project
 USU Technical Studies Product Transmittal Form
 COVER SHEET**

Product Name: Geodatabase Management System - Phase II Report

Task Number (from USU Scope of Work): All tasks and deliverables under the Phase II SOW for the Geodatabase Management System

Date: December 1, 2001

Author: Robert T. Pack

Abstract

This report summarizes Phase II activities associated with Database Management System work defined in the SOW for Technical Studies dated July 21, 2000. Work associated with data catalog assembly, data collection, development of the computer server, and DBMS management and visualization software development (along with documentation) is reported in this document. All work is progressing satisfactorily and will be completed during Phase III.

Document Category	Reviewed for the Following Attributes	Audience¹
<input type="checkbox"/> Preliminary Draft	Content, reference citations, completeness..... relative to adopted SOW, accuracy, “whats missing”	Tech Teams/Leads
<input type="checkbox"/> Draft	Same as preliminary draft plus public presentability (e.g. layout, spelling, etc.)	Planning Unit, Staff Team, Tech Teams/Leads, Joint Board
<input type="checkbox"/> Final Draft 1or 2	Peer Review Panel reviews for technical accuracy and completeness (if routed to PRP). Others review for response to comments on prior versions.	Peer Review Panel, Staff Team, Tech Teams/Leads, Planning Unit, Joint Board
<input checked="" type="checkbox"/> Final Product	No review required.	Wide distribution

Comments: This report is essentially a progress report. All software and interfaces will be subject to substantial changes and revisions during Phase III.
